problems solved!

your biggest issues, so at least your beauty routine can be hassle-free. BY meredith gray

skin

problem

“I CAN'T HIDE MY ZITS!”

solution What's worse than a big zit? Obvious concealer. Instead of layering on the cover-up, first neutralize the redness, then cover the bump.

1 Use a green-tinted concealer to tone down the pimple's redness.

try: Physicians Formula Blemish Rx Healing Concealer in Soft Green, \$9, drugstores

2 Dot a light oil-free cover-up on top of the green, then dab gently until it blends in.

try: Maybelline New York Mineral Power Liquid Concealer in Sand, \$8, drugstores

The green cancels out redness completely!

problem

“MY BROWS ARE RED FROM TWEEZING!”

solution If your skin is sensitive, it may get irritated from plucking. Store your tweezers in the fridge (the cold will numb the area), then apply a healing balm to reduce redness.

PS:

- ✓ Tweeze after a shower, when pores are open, so the hair comes out easier.
- ✓ Pull out the hair in the direction it grows.
- ✓ Pluck only one hair at a time.

After Tweeze™ by TWEEZERMAN®

try: Tweezerman After Tweeze Soothing Cream, \$10, drugstores

problem

“I HAVE DRY, ITCHY PATCHES!”

solution Chilly temperatures, wind, and dry indoor heat can cause your skin to get extremely dry. Use hydrocortisone cream to calm the areas that are uncomfortably itchy.

try: Cortaid Intensive Therapy Moisturizing Cream, \$8, drugstores

EXPERT TIP

“Don't rub the cream in too much or you'll irritate your skin more. Dab it lightly onto your skin and give it about 20 minutes to sink in.”

—Kenneth Beer, M.D., cosmetic dermatologist, West Palm Beach, FL

problem

“MY SKIN IS SO SHINY!”

solution Before applying makeup, use a mattifying lotion to moisturize skin and absorb excess oil. Soak up midday shine with a dusting of a translucent powder.

in the morning

try: Mark Matçe Chance Mattifying Lotion, \$15, meetmark.com

afternoon touch-up

try: CoverGirl Fresh Look Pressed Powder in Translucent Medium, \$6, drugstores

Hayden looks fresh and dewy—never greasy!

problem

“I HAVE WEIRD WHITE BUMPS!”

solution Exfoliation is the key to getting rid of bumps. Replace your regular face wash with a daily scrub. It will smooth your skin and slough away the bumps.

Those tiny white bumps, called milia, are actually dead skin cells that haven't flaked off correctly.

try: Clean & Clear Soft Purifying Cleanser, \$7, drugstores
